Product Description

ASSE 1022  
3/8 Flare x 1/2

ASSE 1022 vented check valve protects the connected piping from the corrosive effects of gas mixed with water in the event of back flow from the discharge primary cycle. If this check valve fails, the CO2 gas and water can pass to the vent fitting. The valve cannot pass to the vent from the connected piping. Construction is easy with brass body and stainless steel

Under no circumstance is the CO2 gas and water mixture exposed to the lead-free brass inlet or the connected plumbing.
