Product Description

Aquatec De... Pump 6.0 G... Foot Cord, 2...

The Aquatec 550 Series Diaphragm Pump is designed to operate at low pressure from a low pressure source. It can run continuously and pumps can be operated continuously (pressure switch controlled) or intermittently (controlled by external pressure switch). It is needed an integral pressure switch to maintain pressure. 5-chamber diaphragm Independent structural integrity

composite plastics Corrosion resistant metal Pressure switch and transducer options Aquatec 5513 Demand Pump Benefits: Self-priming Unparalleled performance efficiency Whisper quiet at lower flows Minimal pulsations 7 year design life Runs dry without damage Chemically resistant versions Aquatec 5513 Demand Pump Technical Information Aquatec 550 Series Demand Pump Data 5513 550 Series Superflow Pumps Aquatec 550 Series Superflow Pumps Duplex 2 Series Pumps are suited for chemical or beverage and water applications such as city water pressure boost. Built in check valve.

Product Description

ASSE 1022
3/8 Flare x 3/8

ASSE 1022 vented check valve protects the connected piping from the corrosive effects of gas mixed with water in the event of back flow from the discharge primary cycle. If this check valve fails, the CO2 gas and water can pass to the vent fitting. The vent cannot pass to the connected piping from the connected piping. The construction is easy to install on brass body and stainless steel.

Under no circumstance is the CO2 gas and water mixture exposed to the lead-free brass inlet or the connected plumbing.

Product Description

ASSE 1022 Backflow Preventer, 3/8 Flare x 3/8 Mpt x 1/4 Barb

Item Non Stock and Must Be Ordered. ASSE 1022 vented dual check back flow preventer protects the connected plumbing and drinking water from the corrosive effects of CO2 gas. The CO2 gas mixed with water in a carbonator tank downstream from the back flow preventer exerts back pressure on the discharge primary check valve on every pumping cycle. If this check valve becomes fouled and leaks, the CO2 gas and water mixture will exhaust through the vent fitting. The secondary check insures that it cannot pass to the inlet or contact any brass or copper from the connected plumbing. The simple internal construction is easy to clean. It utilizes a lead free brass body and stainless steel discharge retainer. Under no circumstance is the CO2 gas and water mixture exposed to the lead-free brass inlet or the connected plumbing.
