Product Description

Cartridge Water Filter Magnesium 3/4 Inches

This true Alkaline filter contains several layers of different medias that emit Far Infrared Rays. The first stage will give your water a soft feel. The second stage process starts with a sediment filter. The third stage is a magnetic module. The fourth stage is a water treatment wand. The fifth stage is a media is minded from our special blend of Carbon, Calcium, and Magnesium. This gives the water a mineral taste to the water. The sixth stage is Carbonate and Magnesium. The seventh stage is a stream. Tourmaline. The eighth stage is Far Infrared Rays and the ninth stage is a ceramic media disc. The tenth stage is ions (above 800/cc) which increases the water's pH. The eleventh stage is the oxidation-reduction potential. The twelfth stage is "Super Ceramic" layer.

imparts a pleasant taste to the water while emitting even more Far Infrared Rays. Almandine Garnet is a naturally occurring gem mineral with uniform physical, chemical, hardness, friability and micro-structure characteristics, which provide the essential properties for the water filtration processes. The KDF Redox layer incorporates a special blend of high purity Copper and Zinc to reduce heavy metals, microorganisms, scale, and is listed bacteriostat. The water exits through a polishing sediment filter ensuring safe, clean and crystal clear drinking water.
